During our inspection we will:

- Measure total house air leakage.
- Identify leak locations.
- Measure HVAC system duct leakage, pressure & performance.
- Inspect insulation levels and assess performance.
- Conduct a lighting survey.
- Measure electric loads.
- Check water usage.
- Perform combustion safety checks on gas appliances.

Energy solutions that work for your home & business.

FINDING THE MOST COST EFFECTIVE IMPROVEMENTS

TEST IN. MEASURE. IDENTIFY. PRIORITIZE. FIX . TEST OUT.

FINANCING & INCENTIVES

- \$200 audit subsidy.
- \$4,000 for homes that meet performance goals.
- \$500 federal tax credit for energy efficiency measures.
- State rebates plus 30% tax credit for solar projects.
- Energy efficient mortgage.
- 3% financing, 15 year fixed rate fully amortized loan

What to expect from us.

We will: Examine utility bills and *listen* to concerns about your home. *Inspect* your home using *building science* techniques and measurement tools including infrared thermography. *Identify* cost effective measures to improve your comfort and health, and find energy saving opportunities. *Deliver* a report with detailed findings that allow you to prioritize improvements. *Guide* you toward rebates, tax credits, special financing programs. *Contract* with you to perform the improvements that you choose or help you *select* other qualified contractors.

Some efficiency measures can return 50% of your investment or more in the first year.

Actual savings depend on:

- Amount of energy that you use.
- How you use energy.
- Which improvement measures you undertake.

Our goals: Improved comfort, health & efficiency

- Reduce dust, allergens & mold by controlling air infiltration.
- Increase comfort by: Reducing drafts and balancing systems.
- Lower your carbon footprint & energy bills by increasing energy efficiency.

BUILDING TYPES WE WORK ON:

SINGLE FAMILY HOMES:

Recommended remediation measures are prioritized for health & safety, comfort, and cost effectiveness, using the 'house-as-a-system' approach to home performance

MULTIFAMILY BUILDINGS

We help building owners and operators identify cost saving retrofit opportunities that can be financed by energy savings.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. En que le podemos servir?
